

TRADEWASTE FOOD OIL INTERCEPTOR & PUMP STATION

FEATURES

The All Purpose Pumps combined Food Oil Interceptor and pump stations are ideal for all commercial food preparation facilities, cafés, restaurants and many industrial food processing plants. They are constructed in stainless steel, polyethylene or fibreglass for simple on-site installation.

SUBMERSIBLE PUMPS:

- > Refer to HYFLOW Submersible Index

NOTES

1. Fats, oils and grease (FOG) from all commercial food preparation facilities must be treated to satisfy the local water authority requirements.
2. Over-all depths or heights, drain locations and vent connections are all approved by the installer to accommodate the exact site conditions.

30 YEARS INDUSTRY EXPERIENCE

ABOVE GROUND

STAINLESS STEEL

- > Heavy duty 304 stainless steel construction with integral strengthening.
- > Multi-part access covers with lock down latches.
- > Inlet, outlet and vent spigot connections.
- > Designed in accordance with the Trade Waste Authority (VIC) requirements.

POLYETHYLENE

- > Lightweight polyethylene panel with internal honey-comb closed cell structure, constructed from UV stabilised polyethylene
- > Screwed access covers, capable of being removed by one person.
- > Inlet and vent spigot connections.
- > Outlet BSP pumpline connection
- > Removable screwed plug on outlet riser for easy removal of any blockages.
- > Designed in accordance with the Trade Waste Authority (VIC) requirements.

BELOW GROUND

POLYETHYLENE

- > Lightweight sandwich panel with internal honey-comb closed cell structure, constructed from UV stabilised polyethylene
- > Multi-part air tight covers
- > Inlet, outlet and vent spigot connections.
- > Removable plug on outlet riser for easy removal of any blockages.
- > Designed in accordance with the Trade Waste Authority (VIC) requirements.
