

TRADEWASTE FOOD OIL INTERCEPTOR

FEATURES

All Purpose Pumps Food Oil Interceptor are ideal for commercial food preparation facilities, cafes, restaurants, and many other industrial food processing plants. Interceptors are designed to separate fats, oils and grease from waste water. The interceptors are constructed from Fibreglass (FRP) and are structurally engineered to withstand difficult ground conditions without failure whilst also being suitable for above ground applications.

- > Inground installation without the need for concrete backfill
- > Above ground installation
- > Adjustable riser
- > Fixed riser to increase installation depth (optional accessory)
- > Engineered lifting points
- > Multi interconnectable tank design for larger capacity

DESIGN AND CONSTRUCTION STANDARDS:

- > Melbourne Water Authorities approved
- > AS/NZS 1546.1 Soil loading design requirements
- > AS2634:1983 Chemical plant equipment made from GRP
- > IP Australian Design No. 201811669

ADJUSTABLE RISER:

- > Unique design helps achieve superior surface finish and reduces installation time by allowing easy ground topography alignment
- > Height adjustment up to 75mm
- > Angle adjustment up to 5 degrees

FRP PIT DESIGN LIFE:

- > Design life of 50 years

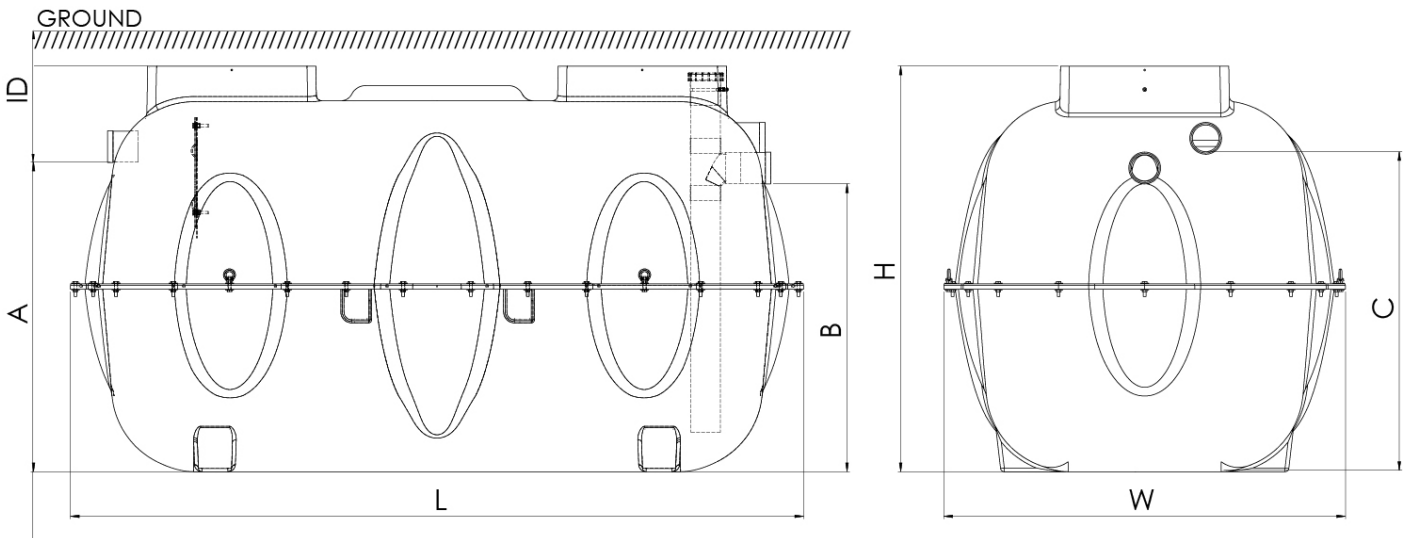

30 YEARS INDUSTRY EXPERIENCE

TRADEWASTE FOOD OIL INTERCEPTOR

DESIGN:
No concrete backfill required for easiest installation

ADJUSTABLE RISER:
Unique riser designs for easy depth and surface alignments

ACCREDITATION:
Design approvals for confident and compliant installations

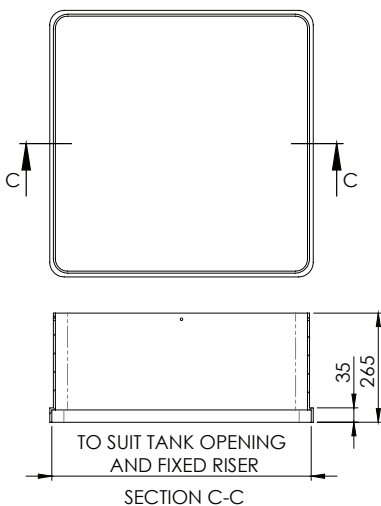

TRADEWASTE FOOD OIL INTERCEPTOR- ACCESSORY

FEATURES

FIXED RISER:

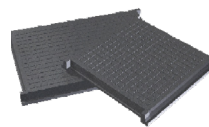

- > Achieve desired installation depth (max. 1000mm to inlet invert)
- > Stackable onto interceptor
- > Can be cut to height for accurate surface finish level
