

HYLIFT® UNDERSINK PUMPS HIGH LEVEL ALARM

30 YEARS INDUSTRY EXPERIENCE

FEATURES

The All Purpose Pumps High Level Alarm (HLA) is designed to provide warning indication when stored liquid is either empty or full.

ALARM PANEL

- > Alarm indication determined by level float switch (close contacts)
- > Alarms include audible (buzzer) and visual (LED pilot light)
- > Power on indication
- > Buzzer can be muted or will automatically silence after 5 minutes
- > Visual alarm will remain on until condition is eradicated
- > Voltage free contacts for connection to auxiliary devices
- > Polycarbonate enclosure
- > SS mounting plate
- > Voltage free common alarm output for BMS connection

LEVEL FLOAT

- > Magnetic level float
- > Horizontal internal mounted with back nut
- > Maximum current: 0.6A
