

COMPONENTS HOSE KITS

FEATURES

These hose kits are ideal for connecting to a range of submersible pumps for discharging of water from building sites, flooded basements and more. The kits have polypropylene cam-lock connections to avoid corrosion and help resist impact damage.

REINFORCED HOSE KIT:

- > 20 Metres grey PVC suction / delivery hose, flexible and anti kink hose, male and female cam-lock connections and worm drive clamps
- > Male cam-lock pump connector
- > Poly BSP fittings to adapt to a range of pumps
- > Adaptor to enable vertical hose discharge or horizontal discharge connection for low level anti kink applications

LAYFLAT HOSE KIT:

- > 20 Metres blue PVC layflat hose
- > Male cam-lock pump connector
- > Poly BSP fittings to adapt to a range of pumps
- > Adaptor to enable vertical hose discharge or horizontal discharge connection for low level anti kink applications
