

TRADEWASTE PH CORRECTION

FEATURES

All Purpose Pumps designs, builds, supplies and aids in the specification of efficient turnkey trade waste solutions. pH Correction is geared for single or two way dosing and supplied in above or below ground configurations. pH Correction systems use quality sensors and dosing pumps to ensure the waste water is within the desired pH range when leaving the system.

COMMON OPTIONS:

- > Isolation when out of specification
- > Test points
- > Solids removal
- > Monitoring, control & data logging
- > Alarm notification
- > Waste treatment system feed or discharge pump stations
