ALL PURPOSE PUMPS™

DOMINATOR®

COMMERCIAL & INDUSTRIAL FIRE PUMP SYSTEMS BUILT TO AUSTRALIAN STANDARDS

FIRE SAFETY SPECIALISTS

All Purpose Pumps is a trusted Australian supplier of fire pump systems, delivering reliable, high-performance solutions for projects nationwide. From single-pump sets to fully integrated multi-outlet systems. All our systems are built & tested in accordance with current applicable standards including AS2941, AS2419 & AS2118, to meet the demands of critical fire protection applications.

Backed by extensive industry experience and technical expertise, we work closely with consulting engineers, project managers and trade contractors to deliver solutions tailored to individual project requirements. Our commitment to quality, compliance and dependable performance makes All Purpose Pumps a trusted partner in delivering effective fire protection systems.

TYPICAL APPLICATIONS

- SCHOOLS

STANDARD CONTROLLER FEATURES

DIESEL & ELECTRIC RANGE

- Built to the necessary Australian standards
- Lockable powder coated steel cabinets
- Pad lockable mains isolator switch
- Manual test start - push button
- Manual pump stop - push button
- Crank isolate key switch
- Led indicator lights for system run, alarm and status display
- Indicator test - push button
- LCD engine status display
- Audible alarm and mute - push button
- Fuel tank level display
- External visual alarm light and status outputs
- Battery trickle charger

BECOME PART OF THE TEAM

A SUCCESSFUL PARTNERSHIP

WHY YOU WILL BENEFIT WORKING WITH ALL PURPOSE PUMPS

At All Purpose Pumps, our commitment extends beyond the supply of equipment. We work closely with our clients throughout every stage of their project, providing expert guidance and technical support from initial design and system selection through to manufacture, timely delivery, installation support and commissioning.

Our ongoing service and preventative maintenance programs ensure continued system reliability and long-term performance. By choosing All Purpose Pumps, you gain more than a pumping solution; you establish a trusted partnership built on expertise, reliability and ongoing support.

OUR KEY BENEFITS:

- Over 35 years industry experience
- Proven experience in understanding unique system requirements
- Advanced and innovative solutions for the toughest applications
- Technical support and field service for peace of mind
- On-site commissioning, matching system performance to actual site demands
- Best practice build and stringent factory testing for quality outcomes
- Fast turnaround times

SERVICE, SUPPORT AND AFTERCARE

We work closely with clients throughout projects, providing ongoing preventative maintenance, major repairs, and upgrades. We also offer recommendations to reduce operational costs and enhance equipment reliability.

COMMISSIONING

- Ensures the pump system meets actual site demands and correct installation with a Pre-Commissioning Checklist
- Provides expert on-site verification by trained Pump Technicians. Ensures a quality installation according to specifications
- Facilitates smooth system operation through an extensive commissioning process
- Ensures the system is compliant with APP's warranty

PUMP MAINTENANCE & PERIODICAL SERVICING

- Our trained technicians use detailed checklists for preventative maintenance, ensuring optimal system condition
- Offers cleaning and replacement of consumable parts as needed
- Flexible service agreements available for individual systems or multiple pump systems, with 3, 6, or 12-month servicing schedules tailored to specific applications.

PUMP SYSTEM UPGRADES & MODERNISATION

As pumping systems age, performance and reliability can decline, leading to higher operating and maintenance costs. All Purpose Pumps helps customers modernise existing systems through targeted upgrades, smarter controls and high-efficiency equipment, improving reliability, reducing downtime and extending asset life while making the most of existing infrastructure.

- Restore performance, reliability and efficiency in ageing pumping systems
- Extend asset life and get more value from existing infrastructure
- Upgrade control systems with connectivity, remote monitoring and improved system visibility
- Integrate modern technologies to support smarter operation and maintenance
- Replace ageing equipment with high-efficiency pumping solutions
- Reduce unplanned downtime and maintenance requirements
- Lower operating costs through improved system performance and energy efficiency
- Adapt existing infrastructure to meet changing operational needs
- Bring systems in line with current industry standards and best practice
- Improve long-term reliability without the cost of a complete system replacement
